*Generated multiple product lines for the business.*

*Defined pricing strategy from per product and multiple-products perspectives.*

*Employed multiple marketing strategies for business growth and market reach out.*

*Developed a website using multiple technologies and platforms.*

X ----- X ----- X

Below is very brief description of the process of development of product lines from website perspective.

**1. At Glance:**

Developed an intuitive website (<https://safestorage.pk>) for public, using AWS web-hosting, WordPress platform for frontend, backend, and databases, featuring,

- a. Sign Up/Login.
- b. Storage Selection and Storage Calculator.
- c. Pricing.
- d. Promotions.
- e. Security – SSL encryption and recaptcha-v3.
- f. Contact Forms – connected with 3<sup>rd</sup> party webmail server.
- g. Webmail – Configured mail distribution.

**2. Web-Hosting:**

Integrated WordPress seamlessly with multiple web-hosting servers, such as **AWS** (EC2, LightSail, and Route53), Hostbreak, and Domain.

### 3. Mailing Server:

Established **mail server connections (records)** seamlessly integrated with AWS LightSail, ensuring efficient handling of communication related to Emails, Contact Us Inquiries, Orders, and Payments. For example, Order and Contact Us forms are shown below, which will generate emails separately and send to mail client.

The image displays two web forms side-by-side. The left form, titled 'Have Questions? Contact Us!', features input fields for 'Enter Your Name', 'Enter Your Email', and 'Enter Your Message', along with a checkbox for 'I agree that my submitted data is being collected and stored.' and a 'Send Message' button. The right form, titled 'Order Your Storage Unit', includes fields for 'Enter Full Name', 'Enter Your Email', 'Enter Phone', 'Storage Unit size (ft)' (a dropdown menu), '2024-01-29' (a date field), 'Number of days needed', radio buttons for 'Business' and 'Private' (with 'Private' selected), a checkbox for 'Need a Truck', and a large 'Enter Message' text area. A 'Place order' button is located at the bottom right of this form.

### 4. Security:

- Configured security using **SSL Certificate**. Configured and integrated the website with SSL Certificate provider.
- Implemented **recaptcha-v3** to avoid scams and fake registrations.

### 5. Textural Information:

Utilized **ChatGPT** (using prompt engineering concepts) to create text transcripts, enhancing the conveyance of information related to not only following but also more (as available in website).

- Terms and Conditions.
- Privacy Policy.
- Storage Options.
- Self-Storage Units.
- 24-Surveillance.

f. Packing and Moving Supplies.

6. **Logo Design:**

Designed multiple logos and selected one **logo**, as shown below.

7. **Video Ad:**

- Created video ad for **YouTube**, using **Canva**, for marketing purpose.
  - Canva, is a platform to create banners, slogans, ads, videos, presentation.
  - Creating videos on Canva required to go through tutorials which are available online easily.

- b. Embedded AI generated voice (text-to-voice), in multiple languages.

8. **Marketing:**

Applied multiple marketing strategies.

Google Ads	Applied to local community only to generation conversions for sales.
SMS Campaigns	Sent 100,000+ messages to local community in collaboration with corporate office of national mobile service provider.
UAN Toll Free Number	Established routing, in collaboration with mobile service provider, for in-coming calls on UAN number based on customer need.
YouTube Ads	Published ads in local community YouTube.
LinkedIn Marketing	Established business page in LinkedIn. Launched marketing campaigns to generate conversions for website visits.
Google Analytics	Utilized to get the stats on visits by connecting with Google Ads and LinkedIn marketing.
